Assignment 1 –Server-Side Scripting with ASP.NET
Project Plan Template

Before submitting this document, you must first **submit your project idea and receive instructor approval** on Blackboard. First choose your section and review the list of projects already submitted to ensure your application is **unique**. You cannot build an online store for this assignment as we are doing that together in class.

The application you will build will be completed in four parts (this being the first) over the semester, for a total of 45% of your overall grade.

1. Project Proposal - 5%
2. CRUD Functionality - 15%
3. Authentication - 10%
4. Unit Testing - 10%

Student Name:

Purpose of your application: (2 marks)
Add your project description here.

Why will this application be useful? (2 marks)
Explain the value of this application here.

Private GitHub Repository Link (1 mark)
Provide your link here and ensure you have added **ifotn** as collaborators in your repository Settings / Manage Access. You will use this same repository for Assignments 2, 3, and 4.
